

“Japan OLED forum” 26rd regular meeting
Guidelines for enterprise exhibition display

Executive Vice-chairman / Corporate exhibition manager
Taishi Tsuji (Research & Development Division, Pioneer Corporation)

Dear Sir/Madam,

We thank you very much for providing great help and your attention about the activities of “Japan OLED forum”. The total members of this forum is about 700 people, 200~300 members attend the regular meeting held twice a year, and an enthusiastic lecture and serious discussion are performed. This time, the space for corporate exhibition was established in the venue of the 23rd regular meeting as an annex for the discussion, and as a part of service for the supporting enterprises, based on request from all the members. This exhibition is conducted in the form of booth display with the poster exhibition, actual machine demonstration, and material explanation etc., for a wide range of products, parts, and technologies related to OLED like the parts, materials, manufacturing devices, measurement, evaluation, analyzing equipment etc. We are convinced that this will be a fruitful exhibition as the venue where significant information can be exchanged between each of the exhibiting companies and the OLED engineers and person-in-charge of research and development, in a free atmosphere. Please use the exhibition energetically.

Best regards

Note

[\[Target of exhibition recruitment\]](#)
